

2014 Massachusetts Sewer Rate Survey

Tighe & Bond is pleased to publish our *2014 Sewer Rate Survey* for communities in Massachusetts. The survey summarizes information from the following sources:

- Online and written survey responses
- The 2014 Annual Water and Sewer Retail Rate Survey published by the Community Advisory Board to the Massachusetts Water Resources Authority
- Telephone surveys
- City/Town websites

Historically, the survey has presented an average annual homeowner's cost for each community that is calculated using the industry standard of 120 hundred cubic feet (or 90,000 gallons) of water use. We have continued this practice in the 2014 survey, however we have also included a second calculated value based on residential gallons per capita day (RGPCD) in the Massachusetts Department of Environmental Protection (MassDEP) reviewed performance standards for each public water supplier (<http://www.mass.gov/eea/agencies/massdep/water/watersheds/performance-standards-for-public-water-supplies.html>, 2013), and data from the U.S. Census Bureau (www.census.gov/quickfacts, persons per household, 2009-2013). See next page for example calculation.

KEY FINDINGS

The cost of sewer service is rising.

Annual sewer costs¹ in Massachusetts range from a low of \$221 to a high of \$1,874. **The 2014 average is \$756** and the median is \$729. Two-thirds of survey respondents have increased their rates since our 2012 survey.

The average cost of sewer service has increased by 9.6% since our last survey and more than doubled since 2000.

Approximately 60% of respondents assess a fixed or minimum charge on sewer bills, with 35% including some amount of sewer usage in the charge.

Twenty percent have a separate rate structure for businesses.

Ten percent use less than 100% of metered water usage to determine the sewer bill, with values ranging from 60% to 95%.

Annual Average Cost of Sewer Service

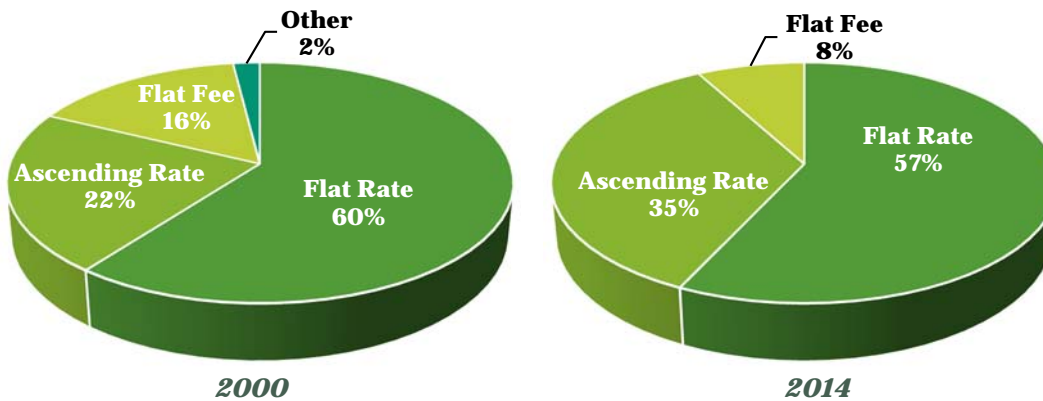

¹ Information based on historical standard.

2014 Massachusetts Sewer Rate Survey

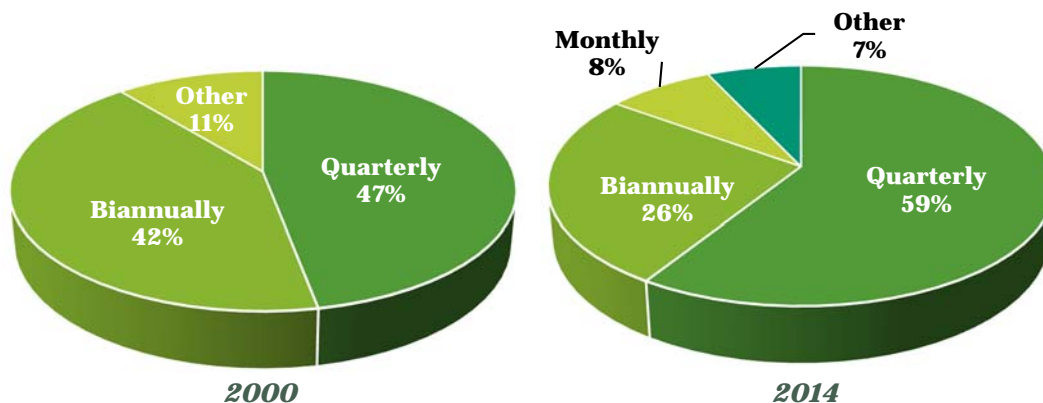

Rate structures are changing.

The majority of Massachusetts communities continue to use a flat rate structure. Ascending rate structures, however, are now used by 35% of communities.

Billing cycles are becoming more frequent.

In 2014, 59% of Massachusetts communities use a quarterly billing cycle. In 2000, bills were typically sent out on a quarterly (47%) or biannual (42%) basis.

We hope that you find the sewer rate survey information useful; if you have any questions or we have incorrectly interpreted information regarding your rates, please contact Mary Beth Morris, P.E. at 413-572-3247 or mbmorris@tighebond.com. Tighe & Bond welcomes your suggestions to improve upon future surveys.

Calculation of Annual Homeowner's Cost based on RGPCD / Local Water Use Data.

- Residential Gallons per Capita Day (RGPCD) Water Use (gallons/person/day) x 2010 Census Persons per Household (persons) x 365 days/year = Gallons per Year
- Example using Abington:
 - 59 gallons/person/day x 2.74 persons/household x 365 days/year = 59,006 gallons per year
 - 59,006 gallons per year / (748 gallons/HCF) = 79 HCF per year ÷ 4 quarters = 19.7 HCF/quarter
 - (19.7 HCF per quarter x \$5/HCF) + \$10 service charge per bill = \$108.50/quarter x 4 quarterly bills = \$434

Abington, Town of
