Tighe & Bond is pleased to publish our 2009 "Sewer Rate Survey" for communities in Massachusetts. The survey summarizes information from the following sources:

- written survey responses
- our extensive database of rate information for our existing clients
- the 2008 Annual Water & Sewer Retail Rate Survey published by The Massachusetts Water Resources Authority (MWRA) Advisory Board
- telephone surveys
- City and Town websites

Our written survey was mailed to all communities in Massachusetts. Based on the information contained in this survey, 59% of Massachusetts communities provide some level of public sewerage service.

A variety of different **rate structures** are used throughout the Commonwealth. Based on the written survey results, 58% of communities use a flat rate structure; 30% use an ascending rate structure and 12% use a flat fee. To allow for a comparative analysis, we have calculated the "typical" yearly homeowner's cost assuming consumption of 120 hundred cubic feet (90,000 gallons) of water per year. Based on the information included in this survey, *typical annual sewer costs in Massachusetts range from a low of \$168 per household to a high of \$1,632!* The 2009 average is \$584 per household, representing a 19.4% increase over the average in our 2006 rate survey.

The majority of respondents to the written survey use either a quarterly billing cycle (53%) or a biannual billing cycle (34%). Five percent bill annually, 5% bill monthly and the remainder use either a bimonthly or tri-annual billing cycle. Of those communities responding to the written survey, 23% reported that they have a separate rate structure for businesses and 16% provide elderly discounts. Four percent of communities report that they offer an early payment discount. A mere 2% provide separate seasonal rates and 8% provide low-income discounts.

Tighe & Bond would like to thank all communities for their participation in this survey. Comparisons of sewer rate structures and resulting typical homeowner's costs can be difficult given the wide variety of user charge methods in use. If we have incorrectly interpreted information for any community please let us know and we will make appropriate corrections. Questions, comments or suggestions are certainly welcome. Please contact Mary Beth Morris, P.E. at (413) 572-3247 for further information and or additional copies.

Tighe & Bond has been providing consulting engineering services to government entities for decades. Ever since the federal Clean Water Act of 1972, municipalities have been faced with the challenge of keeping up with changing regulations governing the discharge of wastewater to rivers and streams. With engineering expertise and current regulatory knowledge, Tighe & Bond has helped many communities meet the challenge of wastewater management. Tighe & Bond also provides expertise in residuals management, water resources management, civil engineering, solid and hazardous waste management and geographic information services.
