WATER RATE SURVEY  
 MASSACHUSETTS PUBLIC WATER SUPPLIERS  
 2002

Tighe & Bond is pleased to publish our 2002 “Water Rate Survey” of public water suppliers of communities in Massachusetts. The survey provides available information from the following sources:

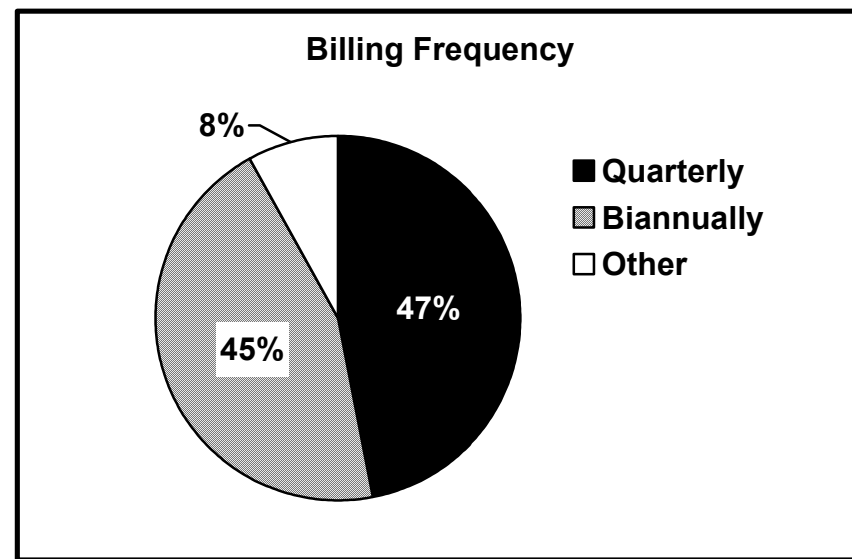

- written survey responses
- our extensive database of rate information for our existing clients
- 2002 Annual Water & Sewer Retail Rate Survey published by The MA Water Resources Authority (MWRA) Advisory Board
- telephone surveys.

Our written survey was mailed to all communities in Massachusetts. Approximately 84% of communities in Massachusetts have public water supply. About 57% of the communities use groundwater as their primary water source, with the remaining 43% relying on surface water sources.

A variety of different **rate structures** are used throughout the Commonwealth. Based on the written survey results, 49% of communities use a flat rate structure; 45% use an ascending rate structure and only 4% use a flat fee and two percent use descending rates. To allow for a comparative analysis, we have calculated the “typical” yearly homeowner’s cost assuming consumption of 120 hundred cubic feet (90,000 gallons) per year. Based on the information included in this survey, *typical annual water costs in Massachusetts range from a low of \$30 per household to a high of*

*over \$750!* The 2002 average is \$290 per household, representing an increase of 7% over 2000 averages.

The majority of respondents to the written survey use either a quarterly billing cycle (47%) or a biannual billing cycle (45%). The remainder use either an annual, monthly, bimonthly, or tri-annual. Of those communities responding to the written survey only 18% stated that they have a separate rate structure for businesses and 15% for elderly discounts. Seven percent of communities report that they offer an early payment discount and 11% provide separate seasonal and low-income rates.

Approximately 72% of the written survey respondents plan upgrade, expansion or replacement of water supply, distribution and/or treatment facilities in the next 5 years. The amounts budgeted are indicated below.

Tighe & Bond would like to thank all public water suppliers for their participation in this survey. Comparisons of water rate structures and resulting typical homeowner's costs can be difficult given the wide variety of user charge methods in use. If we have incorrectly interpreted information for any community please let us know and we will make appropriate corrections. Questions, comments or suggestions are certainly welcome. Please contact Mary Beth Morris, P.E. at (413) 572-3247 for further information.

Tighe & Bond has been providing consulting engineering services to government and industry for decades. An adequate, good quality drinking water supply is essential for every community. Tighe & Bond provides a wide range of water resources services, from identifying needs and evaluating supplies to engineering new sources, treatment facilities and storage and distribution systems. Tighe & Bond also provides expertise in wastewater and residuals management, civil engineering and solid and hazardous waste management.

Community	Typical Annual Homeowner's Cost	Water Rate	Billing Cycle	Primary Water Source Type	Funding	Separate Business Rate	Seasonal Rate	Elderly Discounts	Low Income Discounts	Early Payment Discounts	Population Served	Last Rate Change
